Ivy House has been sympathetically converted from a former chapel into a five bedroom residential service.

The accommodation is split over 2 floors with 3 spacious bedrooms on the ground floor and a further 2 self contained studio apartments on the first floor.

The ground floor has been designed to provides access for people with mobility impairments and includes a lounge / dining room, en-suite wet room, kitchen and laundry facilities.

The first floor studio apartments are fully self contained with a modern kitchen, washing machine, dining area, lounge, en-suite bathroom and sleeping area.

There is a training and meeting facility within the home that will provide a resource for both service users and care staff.

Ivy House has been designed without compromise, the overall effect is a home with spacious communal areas balanced with privacy and space for each individual.

*Striving to give the opportunity of independence*
